## Work Experience

### TatvaSoft

**Full Stack Developer** (June 2022 - Present)

### GainX

An AI-driven platform that helps users predict costs and perform risk analysis for projects, identifying duplicate work for cost savings. It provides metrics and analytics related to business strategies and resource management.

- Developed a dashboard displaying cost and risk analysis metrics.
- Implemented admin panel for user management and security control.
- Integrated Re-charts and D3.js for data visualization.
- Performed automation testing using Playwright.
- **Tech Stack:** React.js, Node.js, Redux, REST API, MongoDB, Bitbucket, Jira, Re-charts, D3.js, Webpack, GCP

### Aivero

A platform to manage camera devices, sessions, and user access. Supports organization-based and standalone users.

- Implemented user, device, and session management.
- Developed analytics and reporting modules.
- Integrated cloud storage for session recording and playback.
- **Tech Stack:** Next.js, React.js, TypeScript, Nhost, Material UI, GraphQL, PostgreSQL, Hasura, GitLab, GCP, Balena.io, Posthog, Redux Toolkit

## Zilch

An expense tracking system for company employees with role-based access for admins, employees, and super admins.

- Designed dashboard for trip and expense tracking.
- Implemented Google Maps for route tracking.
- Developed a company and profile management system.
- **Tech Stack:** React.js, Vite, TypeScript, Redux Toolkit, Google Maps, AWS Amplify

## EpicPass

A platform for location-based discount offers with payment integration. Supports SSO authentication and SEO optimization.

- Developed coupon and user management features.
- Implemented SSR and SSG for SEO optimization.
- **Tech Stack:** Next.js, React.js, TypeScript, Redux Toolkit

## MyWhaNau

A mobile application enabling schools and families to communicate seamlessly, providing updates on events, reminders, and activities.

- Designed dashboard for centralized management.
- Developed role-based access for admin, schools, and families.
- **Tech Stack:** React.js, TypeScript, Redux Toolkit, Tailwind CSS, REST APIs, Jira, GitHub, Firebase, AWS

## Collective Advertiser Management System

A hierarchical advertiser management system integrated with various third-party platforms for campaign tracking and analytics.

- Developed modules for user and role management, campaign management, and external integrations.
- Integrated Power BI, Comscore, and QP for reporting and insights.
- **Tech Stack:** React.js, TypeScript, Vite, Redux Toolkit, REST APIs, iFrame, AWS Amplify, GitHub Workflow, AWS S3, Jest, RTL, Plotly.js, Highcharts, Jira, GitHub, Material UI.

## IT Path Solutions

**React.js Developer** (Dec 2021 - June 2022)

- Gained proficiency in HTML, CSS, JavaScript, React.js, and Node.js.
- Worked on a Doctor Appointment System as a live project.
